

Shower Curtain Track

DL-Track-1600

**1635mm X 1500mm AS1428.1-2009
Compliant**

Features:

Aluminum shower curtain track kits provide a long term maintenance-free shower curtain solution. Washing shower curtains from time to time is easier than scrubbing soap scum from a glass shower surround. The curtain-runners glide quietly and freely inside the anodized track.

Therefore a lot of space will open up in a smaller bathroom, with less cleaning and maintenance, The ceiling support can be positioned wherever suitable along the curtain rail or where it is suitable on the ceiling.

The precision joiner fits snugly into the extruded curtain track profile, aligning the joined sections perfectly to another. Shower curtains from Ozwashroom ensure straight hanging due to the weighted seams in the curtains.

The ceiling support length is 1000mm and works for most curtain track installations.
